

OOOPS!

On page 2 of the Grand Prix Circuit manual we made a major omission (or is that emission?). We say that you can switch back and forth between keyboard control and joystick control anytime during the game by pressing **J** for joystick and **K** for keyboard. We lied.

It should read like this: “To switch the game control to the joystick, hold down the **CTRL** key and press **J**; to switch to the keyboard, hold down the **CTRL** key and press **K**.”

Sorry about that.
